The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 6, 10-15 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grindley in view of Ganster.

See Paper No. 051005, paragraphs 4-6.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grindley in view of Ganster and further in view of Clemens.

See Paper No. 051005, paragraphs 8-10.

Claims 7-9 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grindley in view of Ganster and further in view of Schumann.

See Paper No. 051005, paragraphs 12-14.

Applicant's arguments filed 8-9-05 have been fully considered but they are not persuasive. The applicants argue that the example of Grindley doesn't show a diol. It shows a polyoxypropylene glycol having a molecular weight of 500 prereacted with the diisocyanate (see page 2, top col. 2). The applicants argue that the example doesn't show the NCO/OH ratio or the claims. The example states that stoichiometric amounts are used, which means an NCO/OH ratio of 1/1. One can further back calculate the equivalents of OH and NCO to verify this. They argue that the example doesn't show the specified functionality of the isocyanate. Diisocyanate falls within the functionality specified in the claims.

Claims 1-3 and 6-19 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 10/816,277. Although the conflicting claims are not identical, they are not patentably distinct from each other because see paper no. 051905, paragraph 16.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
